

Open positions in Actuarial Function in Central Risk Office!

ACTUARIAL FUNCTION MANAGER

We are looking to hire a dynamic actuary (M/F) for the Actuarial, Financial & Model Risk Management department under the Chief Actuary. This department is part of the CRO Office and serves as the independent Actuarial Function for AG Insurance in accordance with the regulatory requirements.

Your position

- You actively participate in performing the Actuarial Function at AG Insurance. You are responsible for drawing up the quarterly, annual and *ad hoc* reports for the Management Committee and/or the Board of Directors of AG Insurance on matters such as technical provisions (BGAAP, IFRS and Solvency II) and new or modified products.
- You present these reports to the Management Committee
- You follow the recommendations contained in these reports.
- You analyse and interpret figures on reserves, profitability, valuation and risk, or oversee such analyses.
- You provide insight and transform such insights into concrete recommendations.
 - You actively contribute to managing insurance risks at the company by establishing, optimising and following the necessary governance practices and by carrying out actuarial-financial and other quantitative analyses.
- You actively contribute to the Actuarial Function's ability to comply with Solvency II requirements, particularly in the areas of:
 - coordinating the calculation of technical provisions
 - evaluating the suitability of the models and assumptions used
 - evaluating the quality of the data used for the calculations
- You represent AG Insurance as a risk expert within the Ageas group.
- You (pro-)actively cooperate with the decentralised risk departments.
- You familiarise yourself with the current internal risk and valuation models including the underlying principles, and you closely follow the latest developments in the field of modelling, risk management and risk analysis. You also participate in the Model Control Board at AG Insurance.

The focus of your function is either the life business lines at AG Insurance (employee benefits, including healthcare, and individual life insurance), or the non-life business line, depending on your experience. In any event, you do not work in isolation but as a team, and you help ensure that common issues can be addressed together. You also actively participate in the Risk Committee for your specific business line.

Your profile

- You are an actuary or have training in a financial or numbers-oriented discipline with at least seven years of professional experience. You still have the drive to learn something new every day.
- You have an excellent command of written and spoken English, plus proficiency in either Dutch or French.
- You are open-minded and a committed team player.
- You have strong written and verbal communication skills, and can convey your ideas in a clear and structured manner.
- You have an analytical mindset and are able to transform abstract figures and analyses into concrete insights.
- You are successful at building up a constructive network of (internal and external) contacts
- You uphold the deadlines that apply to your assignments.
- You are computer-literate and have a thorough knowledge of Excel, Word and PowerPoint (minimum requirement)

We offer

- A company that provides ongoing training and development opportunities and a varied career path
- A stable employer with a clearly articulated long-term vision
- A positive work environment, both within your team and company-wide
- A flexible workplace that supports a healthy work-life balance
- A modern office environment complete with all the latest equipment and technology
- An attractive salary package with a comprehensive range of fringe benefits

ACTUARIAL FUNCTION OFFICER

We are looking to hire a dynamic actuary (M/F) for the *Actuarial Function* department. This department is part of the *CRO Office* and serves as the independent Actuarial Function for AG Insurance in accordance with the regulatory requirements.

Your position

- You will assist the Actuarial Function team with:
 - drawing up quarterly, annual and *ad hoc* reports for the Management Committee and/or the Board of Directors of AG Insurance on:
 - technical provisions (BGAAP, IFRS and Solvency II), profitability and profit sharing
 - Solvency II capital requirements
 - reinsurance
 - new or modified products
 - models, assumptions and data
 - You are versatile and operational in all of these areas, prepare analyses and act as the essential glue that keeps the various team members together.
 - processing, analysing and interpreting figures, and performing profitability analysis and other actuarial-financial and quantitative analysis. In other words, you help to gain insight into these figures in order to advise on good policy decisions.
 - following the recommendations contained in these reports
- You work proactively with all members of the Actuarial Function as well as the entire Risk Management community at AG Insurance, in all insurance segments (individual life insurance, group insurance, non-life insurance, healthcare and disability insurance).
- You support the process of certification by the Actuarial Function in the context of sector group insurance plans and carry out the necessary controls.

- You actively participate in applying the existing governance practices and controls to current processes, and recommend improvements based on experience. In other words, you calibrate the engine to run more efficiently.
- You also support the planning with respect to large-scale cases and/or projects.
- You support the Actuarial Function Managers and the Chief Actuary in further implementing Solvency II requirements, such as:
 - coordinating the calculation of Solvency II technical provisions
 - evaluating the suitability of the models and assumptions used
 - evaluating the quality of the data used for the calculations
- You familiarise yourself with the use of the current techniques and models including the underlying principles, and you take an interest in new developments in the field of modelling, risk management and risk analysis.

Your profile

- You are an actuary or have training in a financial or numbers-oriented discipline and several years of experience under your belt, ideally in a wide range of segments (life insurance, non-life insurance...), or are motivated to get up to speed quickly.
- You have strong written and verbal communication skills, and can convey your ideas in a clear and structured manner.
- You have an analytical mindset and are able to transform abstract figures and analyses into concrete insights.
- You have an excellent command of written and spoken English, plus proficiency in either Dutch or French.
- You are open-minded and a committed team player.
- You are computer-literate and have a thorough knowledge of Excel, Word and PowerPoint (minimum requirement). An interest in programming is a plus.

We offer

- A company that provides ongoing training and development opportunities and a varied career path
- A stable employer with a clearly articulated long-term vision
- A positive work environment, both within your team and company-wide
- A flexible workplace that supports a healthy work-life balance
- A modern office environment complete with all the latest equipment and technology
- An attractive salary package with a comprehensive range of fringe benefits
